DETAILED ACTION

Allowable Subject Matter

1. Claims 11-15 and 19-22 allowed.
1. Claims 2-4 and 7-10 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims rejected under 35 U.S.C. 103(a) as being unpatentable over JP 09-83013 in view of Shibata (5,309,018) further in view of Uchimura et al. (5,235,245)

Regarding Claims 1, 5 and 6, JP 09-83013 discloses in Fig. 2 and 3, tiebars 1, semiconductor elements 2 and 3 loaded on to leads and insulated with resin 6. JP 09-83013 fails to disclose the required deformable tiebars with positioning holes and the required locally thinned portions. However, Shibata discloses lead frame having deformable supports where in Fig. 1, tiebars 1 are disclosed to be flexible/deformable and the positioning holes 9 are used for positioning the package. Furthermore, Uchimura et al. disclose a metallic frame including leads incorporating deformable part for use in a fluorescent display panel where in column 6, lines 15-25, the required locally thinned portion configuration is disclosed.

It would have been obvious to one of having ordinary skill in the art at the time the invention was made to include the required deformable tiebars with positioning holes and the locally thinned configuration in JP 0983013 as taught by Shibata and Uchimura et al. respectively, in order to have a semiconductor package with more reliability and ease of manufacture.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
